MENTAL HEALTH CLINICIAN VISITS

Our Timeline

January

Margaret Rowe, our clinic pharmacist, became a certified diabetes care and education specialist.

February

Less Cancer's National Cancer Prevention Workshop featured key leaders in cancer prevention, journalism, education and gov't, including our executive director, Rob Marino.

May

Our volunteers participated in the Every Kid Healthy Week and the Get Healthy Fauquier Fair.

June

Held Clubs & Scrubs Charity Golf Tournament.

August

Our medical and dental teams attended mental health first aid training, presented by the Mental Health Association of Fauquier County.

September

Our mental health counselor, Cheryl Simms, LPC, CSAC, was recognized by the Pentagon for her work in suicide prevention.

Our Timeline

September

Stacey Shepherd (PA-C) began piloting women's health services one day a week.

Our team hosted the Rappahannock Rough Ride fundraiser.

October

Participated in the Piedmont Smiles' free community dental day.

November

Our dental volunteers provided examinations, risk assessments and learning resources for children in the Head Start program.

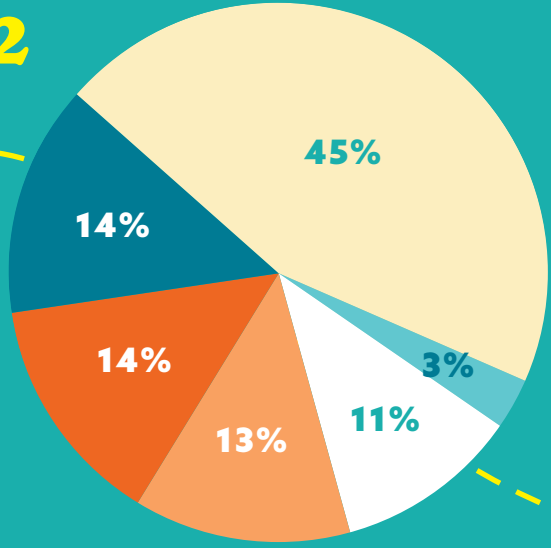

Shannon Raybuck was presented with the VHCF Mental Health Champions award.

Piedmont Smiles

In October, we hosted a free community dental day, Piedmont Smiles. At this event, we were able to serve 211 patients providing dental care services, including hundreds of fillings, dental extractions, surgical care, and cleanings. Many shared they had not received dental care in years. In some cases, it was their first-ever encounter with a dental professional.

The volume of patients who sought free dental help is a reminder to us that oral health is still a critical unmet need for many local families. Since dental health is essential to overall health, we have initiated renovations to add four more dental chairs to the Free Clinic and grow our clinical staff to increase the number of dental care visits we are able to provide.

Patient Story

Our patient “Sofia” had been coming to the clinic to manage other health concerns for a while before we could offer her a complete physical and cancer screening. She admitted that she was scared of this kind of visit because her women's health care experiences had often been unpleasant or even painful. She remembered having a panic attack during an outpatient women's exam and IUD placement some years prior.

Our nursing team encouraged her to consider that as she gets older it is more and more important to keep up with recommended screenings and take time to review her overall health. After her visit, Sofia was overwhelmed to find that her exam was completely different from her past experiences. She shared that, “This was the best women's health appointment I've ever had in my life. Stacey Shepherd was not only gentle but her ability to provide expectations and clearly communicate the procedure allowed me to relax and feel safe. I felt like a valued patient, and I will absolutely come back in the future!”

We are very excited to continue expanding our services so that high-quality care can be more accessible to the underserved women in our community.

"It was the
best visit I've

*ever
had!"*

Expanded Care

In May 2021, Fauquier Free Clinic leadership initiated a comprehensive survey of clinic stakeholders in order to facilitate strategic planning. This included a broad spectrum of affiliations and partnerships, as well as the most important group of stakeholders – our patients.

In total, 289 patients and 74 community partners completed and returned the survey, providing a large and diverse respondent pool. Their feedback pointed to the same two needs in our community, providing us with a clear path forward: expanding dental care capabilities and providing women's health services.

Expanding our

footprint
&
services

Looking forward: Dental Expansion

Dental care is health care and is critical to overall patient welfare.

The current space will be renovated to add four operatories.

Additional rooms will allow us to host volunteer specialists or add more hygienist care after the initial period.

With two full-time dentists and two full-time hygienists in the new setting, we will increase capacity from 300 encounters monthly to over 500.

Limit outside referrals with the goal to provide more quality care in-house.

Looking forward: **Women's Health Expansion**

Women's health care is an area of significant need that has not been accessible for low-income women in our community.

New dedicated shifts for preventive care visits focused on women's health needs. Includes family planning and other support.

More thorough assessments and health tracking, from intake and triage to outside referrals and specialist visits.

Arranging prenatal vitamins for pregnant and breastfeeding mothers.

Additional screening and support for women in unstable home environments.

Ensure our patients are receiving recommended cancer screening such as PAP smears and mammograms.
